- Forestry Body

Manufactured With Confidence

Tethered hand control for flexibility of operation and driver control

Hoist Model	Cylinder Bore-stroke	Operating Pressure PSI MAX	Power Down PSI	Mounting Height	Minimum Long Sill Height	Subframe Height	Approx Weight Pounds
RTB-813	5 1/2" - 13"	3250	800	10"	6"	4"	660 lbs.

Capacity Chart					
NTEA Class 30					
Body Length	8'	9'	10'	11'	12'
Cab to Axle	60"	60"	84"	84"	84"
Hoist (Tons)	13	11	9.5	8	8

- Body raise light for operator awareness
- Long cylinder stroke for maximum dumping angle
- 12-Volt electric hydraulic power unit for ease of operation
- OSHA Required Body Prop for increased safety
- Removable cylinder head for ease of maintenance
- Transitioning valve body in cylinder for maximum lifting pressure
- Grease zerk fittings on all bearing points for ease of maintenance
- Protective pump cover for maximum protection against the elements
- Concentrated seal and cylinder packing for leak free operation
- Hardened chrome polished rod for superior long lasting performance
- Double-acting scissor hoist is designed for optimum stabilized dumping and 'kick back' prevention
- Large diameter cylinder for increased hydraulic pressure and maximum lifting capacity
- Materials and design cycle tested for maximum durability and performance
- Backed by 3-Year limited warranty for ownership confidence!
